Be in demand

Hello Partha!

We couldn't be more thrilled that you've chosen to learn the amazing technologies behind self-driving cars with us. Self-driving cars are going to change the world as we know it, and I'm certain many of the pioneers behind bringing them to the world are in this class!

We can't wait for you to start Term 1 where we will be covering some of the most cutting-edge concepts of self-driving cars. For instance, we'll explore computer vision, deep learning, TensorFlow, Keras and much more! You can read more about what to expect in Term 1 [here](#).

As your start date for Term 1 counts down, we'll be in touch with useful resources and industry news, so that you can hit the ground running.

Social Learning

As the self-driving car industry is still very much in its infancy, growing your personal network by getting to know your amazing classmates will be very powerful. [Some of your classmates have already](#) written their thoughts about why they are taking this Nanodegree, and I'm sure many of you share the same passion, excitement, and curiosity. Want to get started meeting your classmates? [Join our Slack team and introduce yourself today in #introductions!](#)
